

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	18 th June 2026
Team ID	Individual project
Project Name	Complaint Ease :online complaints registration and management system.
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

In many colleges, hostels, apartments, offices, and other organizations, complaints are often managed manually through phone calls, written registers, or direct communication with the concerned authority. This traditional method is not efficient because complaints can be delayed, forgotten, misplaced, or sometimes not addressed properly due to poor communication and lack of systematic management. Users also face difficulty in knowing whether their complaint has been received, processed, or resolved, which creates confusion and dissatisfaction. In addition, maintaining records manually becomes difficult when the number of complaints increases over time. To overcome these challenges, a digital Complaint Registration System is proposed, where users can easily register complaints online, track the status of their complaints, and ensure better communication between users and administrators. This system provides a centralized, organized, transparent, and user-friendly solution for managing complaints effectively and improving overall service management.

Step-2: Brainstorm, Idea Listing and Grouping

In this phase there were many ideas that were put forward, such as:-

Idea 1 – Complaint Registration System

Idea 2 – Student Attendance Management System

Idea 3 – Online Event Registration Portal

Idea 4 – Library Management System

Idea 5 – Online Food Ordering System

Idea 6 – Hostel Room Allocation Management

Idea 7 – Student Result Management Portal

Educational Projects: Student Attendance System, Library Management System

Student Result Portal

Service Based Projects: Complaint Registration System, Food Ordering System

Management Projects: Event Registration Portal, Hostel Room Allocation System;

Step-3: Idea Prioritization

After comparing different project ideas based on innovation, real-world application, technical feasibility, and project completion time, the Complaint Registration System was selected as the final project. This project addresses a common real-world problem faced by many institutions and organizations where complaint handling is inefficient and poorly managed. It provides practical value by creating a centralized platform for registering and tracking complaints. Since the project involves frontend development, backend integration, database management, and user authentication, it is also highly suitable for implementation using the MERN stack. Therefore, this idea was prioritized as the best option for the internship project.
